POUR CENTRALE DE CONTRÔLE D'ACCÈS

GGM AXCS10

GIGAMEDIA
SMART BUILDING SOLUTIONS

SOFT CENTRALE IP 10 READER

The GGM AXCS system is a range of dongles and software developed to manage a centralised AXC access installation. The access control software allows the installation management thanks to an intuitive interface and advanced functions. It can manage up to 50,000 persons. It also allows the creation of multiple sites and multiple posts. This software allows video surveillance and intrusion to be coupled. The software also allows management via a web interface.
