

## SOLUTION HANDLE WITHOUT WIRES

### GGM BEQUILLEAX

#### SMART INTEGO BEQUILLE RANGE AX

The Smart Intego solutions from Simons Voss are dedicated to integrated solutions compatible with third party access control solutions. The new range of Simons Voss Smart Handle AX with careful design allows installation on tubular door frames, mounted on an oval rosette or even adapted to an emergency panic/push bar\*. Numerous options are available to cover the majority of situations. This range of products will adapt to the door thickness, the centres and the square shaft. It exists in versions with the card reader at the top or at the bottom, the handle can be mounted on either the left or right. This series of electronic handles carries the EN-1636-1:2012 and EN1634-1:2014 + A1:2018 fire certifications. The supported RFID technologies are numerous and allow the level of required safety to be adapted for each site. Battery life is estimated at 180,000 cycles. Numerous combinations exist. Please contact us to determine the model best suited to your needs. This SmartHandle AX series is compatible with the **GIGAMEDIA** centralised access control solution \* please ask for confirmation that the combination is possible with your emergency bar
