UNMANAGED POE+ SWITCH
GGM INS5R4P

Unmanaged Industrial Switch
5-Port Gigabit including 4-PoE+ (120W)
DIN RAIL mounting

The **GGM INS5R4P** is a non-manageable PoE+ switch with 5 Gigabit ports including 4 PoE+ ports (120 W), designed for simple surveillance and Wi-Fi applications.

This PoE+ switch reduces costs by eliminating the need for multiple power outlets to power each device on the network (PD) at distances of up to 100 meters.

All Power Sourcing Equipment (PSE) and LAN ports use auto-negotiation technology to discover compatible devices.

The **GGM INS5R4P** is built with industrial-grade components to protect it from hazards such as vibration, shock, freefall, interference and dust, making it resistant to harsh industrial environments.

To ensure reliable operation of connected devices, it uses a redundant power supply system and an alarm relay that issues alerts in the event of a power failure.

- Robust components designed for harsh industrial environments
- Quick and convenient installation with auto-negotiation
- PoE applications: intelligent monitoring and wireless access points
- Power failure protection: Redundant power supply and alarm relay

FEATURES

Ethernet :	Yes
Number of ports 10/100/1000 Mbps RJ45 :	5
Number of ports PoE :	4
Max. PoE power :	120 W
Mounting method :	DIN rail
Layer 2 :	No
Layer 3 :	No
Manageable :	No
Power over Ethernet (PoE) :	802.3 at (PoE+)
IP protection :	IP30
Height :	138.33 mm
Width :	31 mm
Depth :	113.8 mm
Compatible with Grade2TV according to XP-C 90-483 :	No
Compatible with Grade3TV according to XP-C 90-483 :	No
