

SFP MODULE GGM MSFPLXCISCO

1000Base-LX SFP Mod SMF
LC connector
10 Km Cisco

SFP (Small Form-Factor Pluggable) module also called transceiver or "MiniGBIC" allowing the fibre links to be adapted to the network equipment such as switch, router etc.

The optical connector is the LC type.

These different modules allow speeds of : 100Mbps or 1,000 Mbps.

They are compatible with most manufacturer`s network equipment.

They are hot-swappable in network products such as switches which are equipped with places intended for this.

They allow you to cover distances up to 40 Km at 100Mbps and 10 Km at 1,000 Mbps. For your information, it is the switch which determines the type of module to be used.

FEATURES

Sfp/sfp+ :	distance : 9µm/125µm smf : 10km
Speed :	1 Gbps
Wavelength :	1310
Gigamedia compatible :	No
Cisco-compatible :	Yes
D-link compatible :	No
Netgear-compatible :	No
Tp link compatible :	No
Zyxel-compatible :	No
Type of transceiver :	SFP
Shield type :	Fibre optic conductor
Adapted to MMF :	No
Adapted to SMF :	Yes
Connector type :	LC
Gigabit Ethernet :	Yes
10 Gigabit Ethernet :	No
40 Gigabit Ethernet :	No

Active :	Yes
Passive :	No
