TheNXSERV20L2B is a server based on Windows 10 IoT Enterprise. It is fully designed to support the performance needed for a CCTV project based on VMS NX Witness from Network optics.

The software NX witness is already installed and 20 licences are pre-loaded

It embeds Intel Core I3 processor, 2 x 8 Gb DRAM and 256 Gb SSD Hard drive for the OS

This hardware is sized to support up to 30 cameras. If your project extends, you can add extra cameras licences. (GGM VMSL01NXWI)

This device integrates 2 empty HDD slot to install HDD for your video footage. Each slot can support up to 10 Tb capacity.

Several video output are available to display vidéo streams up to 4K

Network performance is ensured by two 2.5 Gbs ports to avoid any transmission issues due to high volume of data to transmit in real time.
