

Small commercial sound kit GGM PAKIT4S

The GGM PAKIT4S sound system is dedicated to small size installations such as shops, restaurants, hair-dressers etc. It comprises a 60W desk-top amplifier and 4 suspended ceiling flush-fitting loudspeakers* with maximum power of 6 W each. The amplifier has a SD/USB connection for reading mp3 files from an external memory (SD card or USB key). It also has a FM radio Tuner for diffusion of radio programs and Bluetooth connectivity (mobile phone, tablet) and to read its contents. Finally, this amplifier has 2 RCA inputs for connecting external sources. A MIC input is also available with 6.35mm Jack plug for making announcements. *Possibility to add 4 additional loudspeakers with 6 W power each.

Product features

- Impedance : 13.3kOhm, 6.7kOhm, 3.3kOhm, 1.7kOhm

Article features

- Bluetooth connectivity : Yes
