

PinCode Keypad MobileKey OVS MKTRAPINCODE

Opens the door with a four to eight digit code You can fit the extra-thin PIN code keypad indoors or out with no need for wiring and it can even be mounted on glass. Gain time and money by attributing for example a special code for the outer entry door. In the network version (MK.PINCODE.ONLINE), the user PIN can also be modified and managed online via the Web application. The SmartBridge radio link allows the keypad to be installed even when the SmartRelais or the cylinder is absent. It is opened once the SmartBridge has processed the verification on the server.

Product features
