

Wall mounted IP amplifier with 2 x 15 W output GGM IPAW215DE

Wall mounted amplifiers provide a localised and economical sound system for a room. They are discrete and have 2 x 15 W 8 Ohm.LS outputs. They use IP connections to recover music and messages from the IP network. They also have an AUX input and MIC input for more local use. These solutions are ideal for classroom sound systems, meeting rooms and sports halls.

Product features

- Network interface : RJ 45 100Mbps input
- Operating temperature : From 5°C to 40°C
- Power supply : 220 vac
- Audio format : MP3
- Protocols : TCP/IP, UDP, IGMP (multicast)

Article features

- Auxiliary input : Yes
- Power Consumption :
