

STARTER KIT SOBOX GGM SOSKCH

Starter kit SOBOX Switzerland

Also dedicated to restricted environments, doctors' offices, pharmacies, supermarkets, shops..., the SOBOX box is the evolution of the 123 CONNECT box.

Indeed, after having innovated in 1999 by launching on the market our offer «123 CONNECT», the objective of the project «SOBOX» was to design a new offer which, in addition to computer pre-cabling, can also allow you to integrate video surveillance solutions, sound system, as well as an operator BOX, all in a box that is as compact and discreet as possible compared to a 19" box.

Components already packaged to carry out an installation of 16 stations (excluding cables).

GGM SOSK COMPOSITION:

- ▶ 1 x Box 11U (GGM SOCOF11UN)
- ▶ 1 x 16-port patch panel to equip (GGM SOPV16RJN)
