

4K résolution conférence bar microphone pickup distance up to 8m. Echo cancellation, intelligent noise reduction, voice enhancement. Caméra angle of view 112.7° (Diagonal)

UNW HB7199CA08

This camera offers high-resolution video capture at 4K resolution and 30 frames per second, ensuring detailed and smooth footage. The sensor pixel size measures 1.45 x 1.45, contributing to clear image quality. It provides a wide field of view (FOV) with a diagonal angle of 112.7° and minimal distortion ($\leq 2\%$), enhancing visual accuracy. Equipped with an omni-directional 8-microphone array, the camera ensures comprehensive audio coverage with a pickup angle of 180° and a pickup distance of up to 8 meters. It supports advanced audio functionalities such as echo cancellation, auto gain control, and noise suppression, facilitating clear and enhanced sound capture.
