

HID READER GGM AXRHMI

READ HID 900NTNNEK ICLASS MIFAR

HID is a major player within the access control domain. The HID R10 SE (900NTNNEK) reader is capable of reading Iclass HID formats as well as CSN of Mifare Classic cards (13.56 MHz). They are equipped with LEDs indicating the operational state of the product. They are suitable for the majority of installations thanks to the black colour and slim size.
