

5mW visual fault locator (VFL) for fiber optic test continuity (SC, ST, FC standard adaptor included)

GGM FC2001

Fault locators enable continuity to be ensured and detection of possible breaks in both multimode and monomode fibres by the emission of a laser signal.

Product features

- Source : Typical 650 nm laser
- Included : ST, SC & FC 2,5mm universal adapter, batteries
- Maximum range (km) : 6

ETIM 10 features

- Suitable for : Fibre optic conductor
- Model : Fibre optic laser generator
- Type of indication : LED
- With PC/printer interface : No
- Measured value memory : No
- Suitable for network protocol measurement : No
- Additional device connectable : No
- With measuring head : No
