PATCH PANEL
GGM PAN24VKSL

Unloaded, 24 ports
Sliding version
Keystone format

New sliding patch panel in the range!

Totally modular in design, the sliding patch panels in the GIGAMEDIA range offer functionality, flexibility and ease of use when it comes to installing cabling systems.

The GGM PAN24VKSL panel provides easy access to cables and connectors, making it easier to install and maintain network connections. By allowing precise alignment of cables and jacks, sliding panels help to reduce cable strain, which can improve network performance and durability.

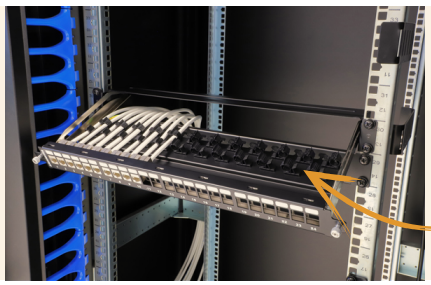

Compatible with all Cat6 and Cat6A RJ45 jacks in the GIGAMEDIA range.

FEATURES

- 19'' premium metal patch panels
- For use with GIGAMEDIA keystone jacks
- Sturdy rear cable support system
- Dimensions : 482mm x 44mm (1U) x 200mm

PRODUCT BENEFITS

- 100% extractable
- Captive screws
- Rear cable management
- Port identification

Thanks to its rear cable support system, these GIGAMEDIA premium patch panels allow you to optimise your installation times by making it easier to comb cables and manage bending radii.
